

FOR IMMEDIATE RELEASE

**OMNI AIR TRANSPORT, LLC MAINTAINS AVIATION RESEARCH GROUP'S (ARG/US) PLATINUM SAFETY RATING
AFTER ANOTHER SUCCESSFUL ON-SITE AUDIT**

TULSA, OK – AUGUST 13, 2008 – Omni Air Transport, LLC announces today that it has, once again, earned the ARG/US Platinum Safety rating after completing an intensive on-site audit. The audit, conducted July 22, 2008 is the third successful ARG/US audit for the company since 2004.

The ARG/US audit is an on-site, voluntary audit performed every two years focusing on all areas of the organization, from maintenance to flight operations. The highest possible rating that an operator is eligible to earn is the Platinum rating, which is awarded to “an operator who has demonstrated the implementation of industry best practices including a Safety Management System, a workable Emergency Response Plan, and appropriate written standards, training, and adequate historical records for all major aspects of Operations and Maintenance within the company.” (www.aviationresearch.com/onsite_audit.asp)

Omni, who operates a fleet of Learjets including one Learjet 45, four Learjet 35A's and one Beechcraft Baron BE-58, was established in Tulsa in 1983 and provides on-demand charter, air ambulance services, cargo, and other special requests. The company has continued to grow since its inception in 1983, and maintains a reputation for safety, attention to detail, and world-class customer service ever since.

“I am proud of every member of the Omni team who has made safety their everyday focus and is committed to our culture of customer service and attention to detail. And, I am honored that we are one of fewer than six percent of operators nationwide who have earned the prestigious ARG/US Platinum rating,” said Dan Burnstein, President and Director of Operations.
